Cooking	Music	Wedding
Cruise	Nascar	Zoo

This is just an idea of different themes you might use to create your themes list. Remember that its important to "keep things together, you would use together." So combing categories when possible might be helpful, i.e., if you have both dogs and cats then you may just need a Pets category. If your family has a variety of Sports interests then you may want to use a "Sports" theme and subdivide individual sports behind the main Sports tab.
