

Challenge – Color Your World:

What to do with ink, glitter, pens, paint...

A good tip from Ginny H.

I have completed this Challenge over a period of several months. After taking the class I set up a station to enter new items into the system easily. I have a 12" x 12" plastic box with scrap paper, a small ink pad, pens, glue, extra catalog and ScrapRack sheets to add when needed. Now, it is easy to shop, bring home and immediately or soon after, add the new samples to the system!!

Challenge Goals

- Have quick, easy access to your inks, pencils, markers, and other “coloring” agents.
- To be able to purchase new products without duplicating what you already own.

Step 1 – How will you store your items?

Challenges with these supplies:

- Different sizes and shapes
- Variety of products

Options Include:

Baskets, boxes/tubs, cases, towers

Totally Tiffany [Pen and Ink Palace](#), [Stash & Store cases](#), [Color Keeper](#), [EZ2O Bags...](#)

I support things that are easy-access like baskets with no lids. Things you can bring to your work table easily and put back quickly.

Step 2 – Gather, Sort, Label

- Gather all your products together
- Sort items by brand and product type.
- Give each of them a number (note: some are already numbered by the manufacturer, so you can incorporate a code and use the manufacturer number if that works for you).
GOTTALOT? You may want to give your products a manufacturer code as well, i.e. Quick Quotes = QQ

Step 3 – Create Color Catalog

Group products by type (chalks, pens, inks, Stickles, even colored pencils), enter the assigned number and manufacturer name of each item into your catalog pages. You may want to create 2 identical catalogs - one to keep in your Rainbow Section, and a portable one to take when shopping.

[Use Tiffany's Peek-a-hue color catalog sheets.](#)

Step 4 – Create Manufacturer Catalog Sheet

Gottalots especially – creating catalog sheets by manufacturer/product type will really help when you're shopping for new products.

Step 5 – Store Products

Store cataloged products together by type in your chosen storage system.

[Gottalittles](#) - Storing products together by color is an option for Gottalittles

Other Options / Ideas:

Get product lists/grids from manufacturers (check their websites). Companies like Tsukineko, Ranger, and Copic have lists you can use to keep track of their products you own. Check their websites or look in the FILES section in the GOC Facebook Group.

Color Challenge Checklist

- Decide on and, if needed, purchase the storage tools that work with the way you craft.
- Gather all your coloring agents together by type and brand.
- [Create catalog sheets](#) by color & by manufacturer
- Post your progress on the [FaceBook group](#) or send us an email.
- When you complete this challenge, celebrate with reward #5
