Alphabet stickers

How many will you need?

This page is very versatile. Many packaged 3D stickers, bling sheets, etc. come in this dimension. In a single base ScrapRack we would recommend you start with 10-20 [Fantastic Five](#) pages.

Use the [Fantastic Five](#) page in:

[The ScrapRack](#)

[The Spinder Binder](#)

[The Craft Binder](#)

Memento Keeper – idea for 5x7 photos and mementos.

Embossing Folder Tips

Cut out the image of the embossing folder that was printed on the packaging.

If the image is on a “thin” piece of paper, simply turn it into a sticker using your Xyron machine. Then adhere the sticker to the front of the embossing folder.

If the image is on a thicker material (i.e. lightweight chipboard), use a piece of tape to create a “hinge”. When you run the embossing folder through your machine, flip the image off the folder so you’ll be sure to get a good impression of the folder without getting an impression of the square image.

Create a sticker using a Xyron machine and stick the image directly onto the embossing folder.

For thicker packaging, use a piece of tape and “hinge” the image to the embossing folder.

Flip the “hinge” back off the embossing folder before using it.
